Subject: Summit Hill Subdivision

Good morning,

Pertaining to this subdivision to include both one- and two-family dwellings, my concerns will be limited to the following.

1. Will there be blasting on this site? If so, I will need direct communications with the blasters.
2. This project will need fire hydrants to be located in areas to be determined by the Fire Marshal.
3. Maintaining access for all emergency vehicles to include proper grade, width and turn-arounds if needed.
